WK73S

wide terminal type flat chip resistors (low resistance)

EU RoHS COMPLIANT

features

- Wide-side termination (reverse-geometry) type flat chip resistor
- High reliability and performance with T.C.R. ±100 x 10^{-6}/K, resistance tolerance ±0.5%
- Suitable for both reflow and flow solderings
- Products with lead-free terminations meet EU RoHS requirements. EU RoHS regulation is not intended for Pb-glass contained in electrode, resistor element and glass.
- AEC-Q200 Tested

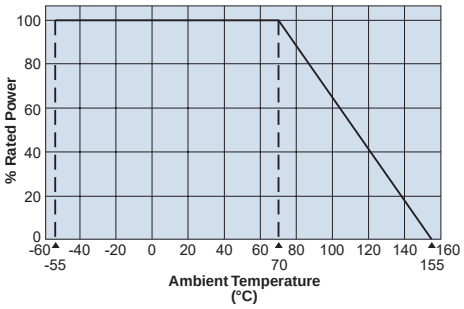
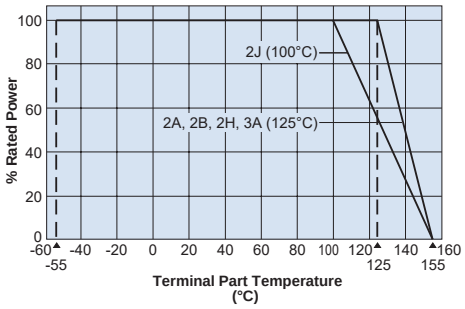
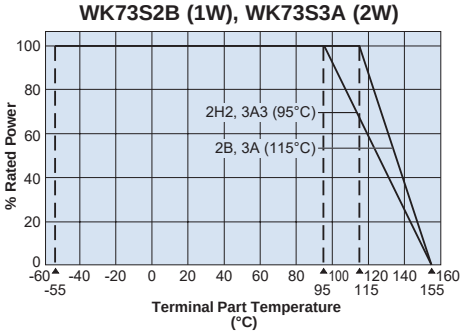
Derating Curve



For resistors operated at an ambient temperature of 70°C or above, a power rating shall be derated in accordance with the above derating curve.

WK73S2B (1W), WK73S3A (2W)





For resistors operated terminal temperature of described for each size or above, a power rating shall be derated in accordance with the above derating curve above.
Please refer to "Introduction of the derating curve based on the terminal part temperature" in the beginning of our catalog before use.
If you want to use at rated power (*1), use derating curves based on the terminal part temperature on the right side graph.

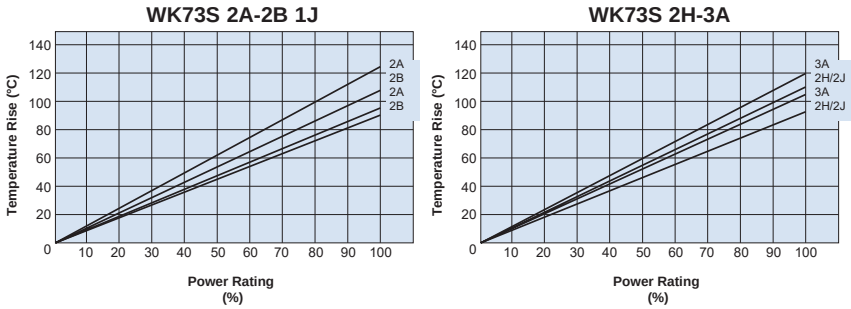
Rated voltage = $\sqrt{\text{Power rating x resistance value}}$

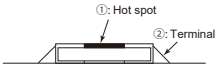
[1] If you want to use at rated power use derating curves based on the terminal part temperature on the right side graph located on previous page.
If any questions arise whether to use the "Rated Ambient Temperature" or the "Rated Terminal Part Temperature", please give priority to the "Rated Terminal Part Temperature." For more details refer to the "Introduction of the derating curves based on the terminal part temperature" in the beginning of the catalog

Temperature Rise

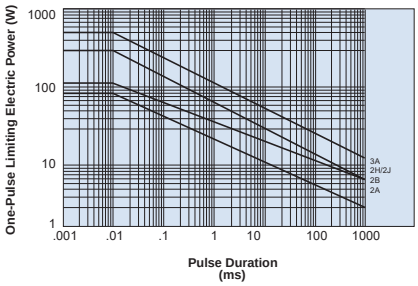


Regarding the temperature rise, the value of the temperature varies per conditions and board for use since the temperature is measured under our measuring conditions.

Measurement condition
Room temperature: 25℃
PCB: FR-4t = 1.6mm
Cu foil thickness: 35μm



One-Pulse Limiting Electric Power



Please ask us about the resistance characteristic of continuous applied pulse.
